

HEPA AIR FILTER - 2000CFM AIR SCRUBBER

61Kg, 79cm × 94cm × 66cm

This HEPA unit provides a higher CFM than other models, making it great for commercial environments with larger spaces. Use less units for the same amount of total CFM.

TYPICAL USES:

- Mould and Indoor Air Cleanup- Remove dangerous mould and VOC's from the air in contaminated spaces and are a vital component of decontamination.
- Restoration and Construction- Used to filter out floating particles and dust, necessary for most remediation works under IICRC guidelines.
- Allergy, Dust and Soot Control- HEPA Air Scrubbers are perfect for helping make the air safer after fires; and can reduce allergy and dust reactions by removing particles from the air.
- Clean Rooms and Server rooms- Used to keep floating particles to a minimum and ensure airborne contaminants are captured safely without compromising room cleanliness.

Specifications

Power Supply (V /hz)	230/50
Current Consumption (Amps)	8
Air Flow (m3/hr)	3400
Fan Speed Settings	2
